DYNAMICS BUSINESS EXCELLENCE

Adopting AI-powered cloud technology

A small to medium-sized business (SMB) guide to growing faster with Microsoft Dynamics 365 Business Central

Microsoft Dynamics 365

Introduction

AI has become a fundamental tool in the way that people get their work done and how businesses find new ways to stay ahead of the competition. And while 71% of small and medium-sized business (SMB) leaders believe that AI adoption is critical for their company to remain competitive, 61% admit their company lacks a vision for AI implementation.[1]

As the pace of business continues to increase, AI offers growing businesses the support to streamline manual processes, connect teams in a unified solution, and keep pace with evolving organizational needs.

For organizations to thrive in today's business landscape, they will need an AI-powered cloud-based business management solution that enables them to transform operations and connect their team in a single application.

1. "Workers worldwide are embracing AI, especially in small and medium-sized businesses," Microsoft, 2024.

The power of AI in Business Central

Copilot and the agentic ecosystem

Realize more value with Copilot in Dynamics 365 Business Central

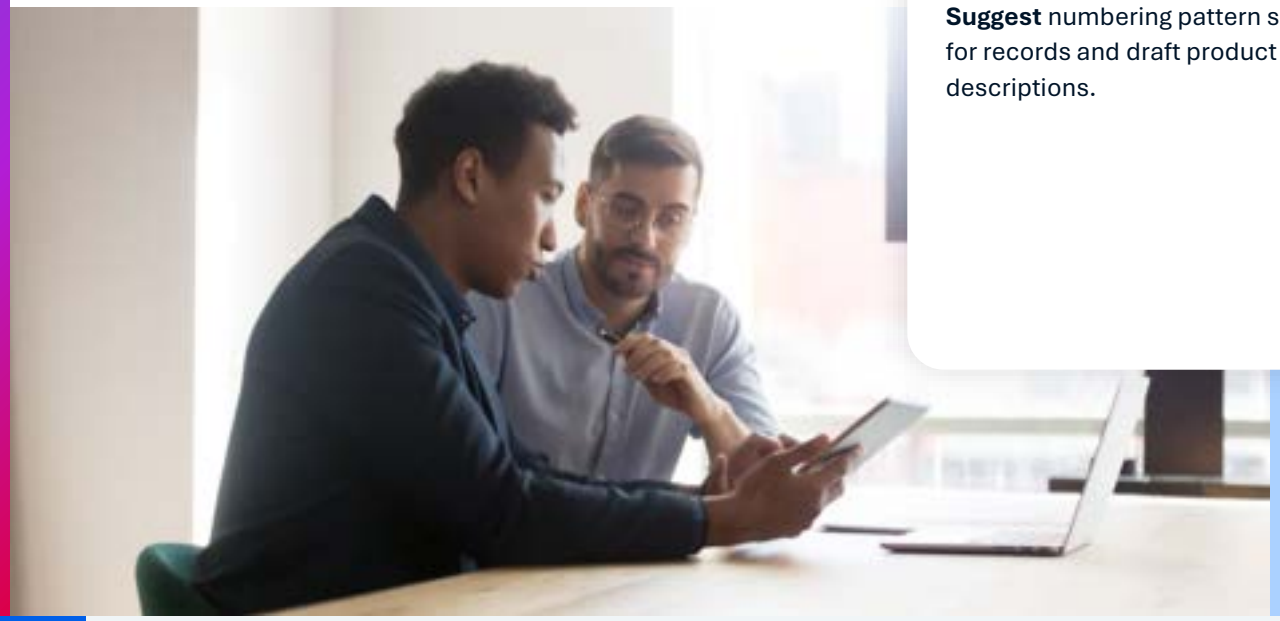

Whether your business is in the early stages of AI adoption or ready to further integrate AI into your company's processes, Business Central offers the AI capabilities to meet you at every AI maturity phase.

Copilot capabilities in Business Central offer three levels of AI capabilities to meet you where you are:

- **Copilot in Business Central:** Enhance personal productivity.
- **Agents:** Improve business productivity with prebuilt and custom agents.
- **Copilot extended:** Connect to the workflows and AI tools in the applications you use every day, and build synergies to save time and uncover new insights.

What Copilot in Business Central can do for you

The Copilot and agentic ecosystem is designed to get you started with AI and scale to meet your business needs.

Use Copilot in Business Central to:

Guide and explain concepts to help you learn new skills.

Find and locate records, pages, and matching products based on natural language inquiries or similar products.

Compare bank statements and incoming e-documents for reconciliation.

Analyze and organize data to help you get to insights faster.

Suggest numbering pattern setup for records and draft product descriptions.

Take automation further with agents built for Business Central.

Sales Order Taker*

- Communicates with customers.
- Interprets customer requests.
- Send quotes.

Payables Agent*

- Receives vendor invoices.
- Captures invoice information.
- Registers invoices according to company policy, preference, and history.

Any individual, regardless of skill level, can build their own agent to create automated workflows that enable them to work smarter.

*In preview

Seamlessly connect Business Central and Microsoft 365 while harnessing the power of Copilot.

Collaborate in the apps you already use like Outlook, Excel, and Teams.

Stay in the flow of work by accessing the data in the tools you prefer without switching applications.

Work between apps with greater continuity guided by AI to get help drafting emails, summarizing information, and more.

Build your own agents in Microsoft Copilot Studio to optimize business processes and enhance productivity.

Dynamics 365 Business Central transition checklist

Dynamics Business Excellence makes switching to Dynamics 365 Business Central easy.

Our expert guidance during the decision-making, planning, and execution stages of the cloud migration process not only minimizes potential downtime but also ensures your employees adapt to Dynamics 365 Business Central quickly and with ease.

Use this checklist to help plan for success:

- [ ] **Set up an initial consultation with Dynamics Business Excellence.**

  Our experts will meet with you to understand your challenges, goals, and current solutions and how to modernize and optimize your business best.

- [ ] **Analyze the IT ecosystem.**

  We will work with your IT team and business leaders to document existing IT infrastructure and apps, including dependencies, security needs, usage, and the business content for each app.

- [ ] **Define and prioritize.**

  Identify the business platforms you want to address and the outcomes you aim to achieve in detail. Outline the benefits that can impact the entire organization.

- [ ] **Plan migration.**

  We will create a comprehensive plan for which apps to migrate, how, and in what order to avoid business disruptions. We can also outline the total cost of ownership of the proposed plan and get buy-in from additional company leadership.
